

## PROMs style-guide University Hospital Basel

PRO part	Description	Example
<b>Concept (PRO) name</b>	<p>Model as the full name of the PRO.</p> <p>If the name is also used as an acronym, model the name in capitals, including the acronym in brackets.</p> <p>If the most known name is an acronym, use the acronym as the name.</p>	Patient Health Questionnaire-9 (PHQ-9)
<b>Archetype ID</b>	Same as concept name unless it is necessary to distinguish from another archetype with a similar name.	OBSERVATION.phq_9
<b>Concept description</b>	Record an explanation of the concept being recorded (not the PRO itself).	see <a href="#">Scores and Scales Style Guide</a>
<b>Purpose</b>	<p>Record the reason for using this archetype to record data, not to describe the purpose of the score or scale itself.</p> <p>Commence the first sentence with the standard phrase "To record..." unless there is a good reason not to do so.</p>	see <a href="#">Scores and Scales Style Guide</a>
<b>Use</b>	(Record how the archetype might be used in implementation, not how to perform the assessment.	see <a href="#">Scores and Scales Style Guide</a>

		<p>Commence the first sentence with the standard phrase "Use to record..." unless there is a good reason not to do so.</p> <p>Additional information might provide guidance to modellers or implementers about how to utilise the archetype in templates or clinical systems.</p>	
<b>PRO-Question</b>	<b>RM Type</b>	Use DV_Scale by default where applicable.	
	<b>Label</b>	Use short text representing the content of the question and include the question number if present in the PROM (as well as for superordinate clusters and answers to the question)	<p>Short label: "1. Carrying groceries" (*see Full Question below)</p> <p>Short label: "2. Vision impairment" (*see Full Question below)</p>
	<b>Description</b>	Record the full text question including the number of the question and the exact wording.	<p>Full text question: "1. I have trouble carrying groceries in my daily life."</p> <p>Full text question: "2. I have a hard time reading traffic signs while driving."</p>
	<b>Comment</b>	<p>Add further info for explicit styling requirements necessary for PROM Validation.</p> <p>Add further information about conditional rendering.</p>	<p>Have "in the last 2 weeks" in bold font.</p> <p>If response "I felt dizzy" was selected ask questions 5, 6 and 7.</p> <p><b>(This might lead to broader acceptance since the datamodel is "helping" the implementor to create a faithful representation of the PROM)</b></p>
<b>Superordinate PRO-Instruction</b>		Use Cluster if there is one parent-container for a group of questions. Label and description	Cluster Label: "1. List of weekly activities"

	<p>follow the same rules like for PRO question.</p> <p>A container/question combination could look like this:</p> <p>Superordinate Instruction/Question</p> <p>1.</p> <p>Subordinate Questions 1a, 1b, ...</p>	<p>Cluster Description: “1. The Following is a list of activities that people do during the week. [...] Go over the activities and indicate your level of limitation over the past weeks:”</p>
<b>Subordinate PRO-Question</b>	<p>Use the same as per PRO-Question.</p> <p>A container/question combination could look like this:</p> <p>Superordinate Instruction/Question</p> <p>1.</p> <p>Subordinate Questions 1a, 1b, ...</p>	<p>Label: “1 b. Over the past 4 weeks, how</p> <p>Description: “1 b. Gardening, vacuuming or carrying groceries” etc...</p>
<b>Total Score</b>	<p>Naming of the total score or calculated ratio should not contain the name of the score or scale.</p>	<p>see <a href="#">Scores and Scales Style Guide</a></p>
